PRESS STATEMENT

SCN Partners with the Technical University of Kenya to Bridge Academia and Impact for a Green Future

Nairobi, Kenya – The Sustainability Champions Network (SCN) is pleased to announce a strategic engagement with the Technical University of Kenya (TUK), through the Department of Physics, Earth and Environmental Sciences, to advance sustainability knowledge and action among students.

The collaboration will officially kick off with the Campus Eco Impact Tour at TUK under the theme “Bridging Academia and Impact for a Green Future.” This initiative seeks to equip students with the skills, networks, and exposure required to thrive in the rapidly evolving landscape of green jobs, ESG (Environmental, Social and Governance), and circular economy innovation.

The Campus Eco Impact Tour at TUK will feature two high-level panel sessions:

The Future of Work is Green – focusing on the growing demand for ESG skills and sustainable careers.

From Campus to Community: Turning Knowledge into Action – highlighting how student innovations and research can be translated into impactful community and industry solutions.

Speaking during the engagement, Wanjira Maganjo, Co-Founder SCN, emphasized the importance of closing the gap between classroom knowledge and practical sustainability application. “This collaboration with TUK provides a unique platform to prepare the next generation of leaders for the green economy, while fostering stronger linkages between academia and industry,” she noted.

Through this partnership, SCN and TUK aim to create opportunities for students to access mentorship, industry exposure, and capacity-building programs that align with Kenya’s green growth agenda and global sustainability commitments.

The upcoming Campus Eco Impact Tour will take place on 12th November from 9.00am to 4.00PM at TUK and will bring together students, faculty, sustainability champions, and corporate leaders to co-create solutions for a greener and more sustainable future.
